

**Only The Brute<sup>®</sup>  
Steel Arch can provide  
massive grain storage**

Whether you are storing grain and equipment or sheltering livestock, The Massive Brute Steel Arch is perfect for the job. The clean open interiors allow for maximum unobstructed functional space. No matter what your requirements, you get more quality and more building for less money.

**Available in 40',  
50', & 60' Widths  
Unlimited Lengths in 27" panels**

The Brute Steel Arch may be used for grain/corn storage provided your building is constructed in accordance with our instructions; and that the levels shown on the maximum grain height tables are not exceeded, taking into consideration the snowload your building will be subject to. All values are for buildings with concrete floor slabs with specified reinforcement steel. The capacities listed are based on estimates of grain heaped to its angle of repose for the entire length of the building. Flat storage or grain loaded through augers will result in lower values.
